

# Join Our Mission:

We welcome all community members within the coalition's service area and beyond to join the SEK Recovery Resources coalition.

We are a hard working and caring group of individuals that help members in our communities live their best lives. The messages we want our community members to see and experience are of resilience and hope as they grow and learn healthy coping skills for life challenges without turning to substance use.

SEK Recovery Resources offers recovery-oriented messaging and programs for those with substance misuse issues. We strive to meet people where they are and help them overcome substance misuse challenges in a safe, healthy, service-oriented recovery environment.

The SEK Recovery House main level is set up to be social. We host recovery meetings, provide a safe space for movie nights, karaoke nights, or to play a friendly game of pool or foosball.

If you would like to donate, volunteer, or book the community rooms for a friendly gathering, please contact us!

**If you are struggling with substance-use in your life, and are curious about recovery, give us a call or come see us!**

**WE ARE HERE FOR YOU.**

## ABOUT US

The SEK Recovery Resources Coalition, supported by HRSA RCORP funds, has made significant strides in providing drug prevention services to school districts, trauma-informed care trainings for agencies, overdose prevention training, and harm reduction supplies to communities in Allen, Bourbon, Coffey, Neosho, Wilson, and Woodson counties.

We have distributed naloxone, safe sex kits, wound care kits, and other supplies, facilitated peer support services, hosted educational sessions, approved scholarships for essential needs, and operated the SEK Recovery House, offering housing and community service opportunities.

However, without continued community support and funding, the future of the recovery house beyond 2025 is uncertain.

To support SEK Recovery Resources, visit [thriveallencounty.org/donate](http://thriveallencounty.org/donate) or contact us for ways to volunteer.

## RECOVERY HOUSE

SEK Recovery Housing strives to provide a safe, secure, and healthy living environment that promotes abstinence-based pathways of recovery, improving one's physical, mental, spiritual, and social wellbeing.

We provide peer-led recovery support to individuals during or after treatment programs, as they transition to living independently and productively in their chosen community.

“An investment in **recovery** is an investment in **community**.”

## THE WORK WE DO

- Facilitate work groups for prevention, treatment, and recovery programs
- Provide peer-led programs and referrals to recovery-oriented systems of care
- Provide transportation services to/from Drug Court and/or treatment services
- Drug Endangered Children Prevention Programs
- Fund prevention campaigns
- Recovery speakers bureau
- Overdose prevention training and Naloxone Distribution
- Safe medication disposal and storage techniques
- Provide Telehealth access
- Discuss harm reduction methods

### MISSION STATEMENT:

*To provide leadership and share expertise in reducing morbidity and mortality associated with SUD/OD in our communities by strengthening the capacity of collaboration for prevention, treatment, and recovery resources.*
